

## RMS magnetic floor sweeper

The SPE range of magnetic floor sweepers has been designed to collect up ferrous and other metallic particles remaining on floor surfaces after blasting has taken place.

The simply operated release mechanism enables easy depositing of debris after collection. The permanent magnet will retain its power for 50 years and requires no maintenance. The height is adjustable to cope with large waste and uneven surfaces. The standard sweepers range in size from 310mm to 915mm wide but alternative towable and forklift mounted models are available.

### Features

- Powerful maintenance free magnet
- Simply operated release mechanism
- Easy moving and manoeuvring
- Permanent magnet
- Adjustable height

### Applications:

- Factories
- Engineering workshops
- Warehouses
- Aircraft hangers
- Cold stores
- Food processing plants
- Multi-storey car parks
- Shopping precincts
- Bus depots
